EDUCATION	Ph.D. in Applied Mathematics Aug 2021 – current Division of Applied Mathematics, Brown University <ul style="list-style-type: none">• PhD Candidate. Advisor: Prof. George Em Karniadakis• GPA: 4.0/4.0. Expected time of graduation: May 2026• Research Interest: AI for Science, optimal control, neuromorphic computation for scientific machine learning Sc.M. in Applied Mathematics Aug 2021 – Jun 2024 Division of Applied Mathematics, Brown University <ul style="list-style-type: none">• GPA: 4.0/4.0• Selected Courses: applied probability and statistics, deep learning, theory of probability, numerical PDEs, PDEs B.S. in Theoretical and Applied Mechanics Sep 2016 – Jul 2020 Department of Mechanics and Engineering Science, Peking University, China <ul style="list-style-type: none">• Excellent Undergraduate Thesis
PROGRAMMING SKILLS	Python (JAX, PyTorch, TensorFlow, NumPy, SciPy, scikit-learn, pandas, Matplotlib), Julia, MATLAB, C/C++, R (tidyverse)
RESEARCH EXPERIENCE (PHD)	High-Dimensional Optimal Control with Transformers Apr 2024 – current <ul style="list-style-type: none">• Develop and apply Transformer-based neural networks to solve optimal control problems utilizing Pontryagin's Maximum Principle.• Capable of solving high-dimensional optimal path planning problems with robustness to perturbations in boundary conditions. Operator Learning for Reconstruction Problems Oct 2023 – current <ul style="list-style-type: none">• Propose the operator learning framework for reconstruction problems.• Implement Transformer-based neural networks for reconstructing flow fields from sparse measurements.• Apply diffusion models to reconstruct data with high-resolution details.• Design foundation models for reconstruction tasks leveraging large language models (LLMs). Neuromorphic Computation for Scientific Machine Learning Apr 2022 – current Collaborate with Yale University, Pacific Northwest National Laboratory (PNNL), and Sandia National Laboratories. <ul style="list-style-type: none">• Formulate regression tasks within the spiking neural network framework.• Validate the stability of spiking neural networks for long-term simulations of dynamic systems.• Prove convergence theorem guaranteeing scientific machine learning models can be converted to neuromorphic hardware with high accuracy and efficiency• Design learning algorithms for neuromorphic platforms to optimize training efficiency.• Lead a research team to initiate and drive follow-up studies within the research group.
RESEARCH EXPERIENCE (UNDERGRAD)	Numerical Boundary Treatment for Differential Equations Sep 2018 – Aug 2021 <ul style="list-style-type: none">• Design artificial boundary conditions for multi-scale simulation of atom chains.• Propose a numerical boundary treatment for simulating shock propagation in the fractional KdV-Burgers equation.
TEACHING EXPERIENCE	Directed Reading Program, Mentor Sep 2023 – Dec 2023 APMA 1650 Statistical Inference I, Teaching Assistant Feb 2023 – May 2024 APMA 1210 Operations Research: Deterministic Models, Teaching Assistant Sep 2022 – Dec 2022
SELECTED HONORS & AWARDS	Award for Excellent Undergraduate Thesis, College of Engineering, Peking University 2020.06 Shuping Scholarship 2019.12, 2018.12, 2017.12 Award for Academic Excellents, Peking University 2018.12 10th National Undergraduate Mathematics Competition, Second Prize 2018.11 34th National (regional) Undergraduate Physics Competition, First Prize 2017.12 28th Beijing Mathematics Competition, Second Prize 2017.11
